

Facial Skin Treatments

Therapeutic Lipid Rich Skin Treatment.....R360

A botanical-oil rich mask based on essential fatty acids and nutrient-rich ingredients leaving the skin deeply moisturised and hydrated, relieving excessive dryness and inflammation and will restore the hydrolipid barrier.

Suitable for: dry, dehydrated and sensitive skin excluding problematic skin.

Antioxidant Vitamin C Skin TreatmentR400

An anti-oxidant rich treatment based on organically derived vitamin C that will boost and improve collagen and elastin regeneration. The skin will appear visibly firm and tight, pores will be refined, and the skin will overall look bright and rejuvenated.

Suitable for: all skin conditions.

Dermal Detoxifying and Purifying Skin Treatment.....R400

Assists the detoxification process of the skin. The Salicylic acid exfoliates the pore lining while the AHA's and enzymes loosen up the dead skin buildup. The Activated Charcoal absorbs excess microscopic pollutants and metal toxins leaving the skin surface and pores detoxified. The skin will appear radiant and ultra smooth. Ideal for congested and problematic skin.

Rejuvenating Phytic Clay Skin Treatment.....R420

This treatment clay accelerates collagen stimulation and dermal rejuvenation and tightening with the added benefits of the highly effective Mandelic acid that presents excellent treatment results for both dermal de-aging, hyperpigmentation and problematic skin.

Suitable for: all skin conditions excluding sensitive.

Revitalising Vita Gel Skin Treatment.....R390

An ultra revitalising, de-aging and rejuvenating gel mask enriched with AHA's and BHA, including peptides and hyaluronic acid. This treatment boosts the skins natural cell rejuvenation process and stimulates collagen production and leaves the skin feeling smooth, moisturised and revitalised.

Suitable for: all skin types excluding very sensitive skin.

TCA Skin Treatment.....R580

A superficial chemical coagulant that revitalises the skin by lifting dead surface cells and stimulates cell mitosis. Trichloroacetic acid (TCA) will effectively refine the appearance of fine lines and wrinkles, enlarged pores and even out skin discolouration. The skin will appear visibly smoother, detexturised and radiant.

*** A course of 4 treatments including a suitable homecare is advised in order to achieve the best possible results

De-Ageing PEC Treatment.....R450

A highly effective deep cleanse exfoliation treatment with de-ageing benefits. This application contains enzymes in combination with Alpha hydroxy acids that will leave the skin visibly brighter, clear and rejuvenated.

Suitable for: all skin conditions excluding sensitive skin.

D-Age 5 Skin Treatment.....R580

A highly effective chemipeel complex compound with Beta-hydroxy, Alpha-hydroxy acids including Mandelic acid. The application targets superficial discolouration and revitalises the skin by lifting dead surface cells and even out skin tone, The skin will appear detexturised and smooth with de-ageing benefits.

Microneedling Pen Treatment.....R800

This treatment will reduce the appearance of ageing and improve conditions like acne scars, enlarged pores and pigmentary conditions. Collagen induction therapy treatments stimulate collagen production which result in visible plumping, firming and moisturising effects.
